

POSEIDON NICKEL MEDIA FACTSHEET 8

Neil Hutchison

General Manager - Geology

Neil Hutchison has over 20 years of experience in the resource/mining industry, working throughout Australia and overseas. He graduated with First Class Honours in Geology from the University of Southern Queensland and is the longest serving member of Poseidon Nickel where he has worked as the General Manager of Geology since June 2007.

Neil is also a Non-Executive Director of Mining Projects Group, an ASX listed nickel Exploration Company.

Neil was formerly the Exploration Superintendent at the Cosmos Nickel Project with Jubilee Mines. He was part of the highly successful exploration team that discovered the Alec Mairs, Prospero and Tapinos deposits which lead to the takeover of Jubilee Mines. During his time at Jubilee Mines, Neil developed a solid understanding of the nickel and ultramafic forming processes as well as the associated modern exploration techniques required to explore for nickel in Kambalda style ultramafic systems.

Since joining Poseidon Nickel, Neil and his geology team have developed the company's resource and reserve base at Mt Windarra. By utilising the skills he developed at Jubilee Mines, Neil lead the team to a new greenfields nickel discovery named Cerberus only 12 months after he joined the Company.

With the recent acquisition of the Lake Johnston and Black Swan Operations, Poseidon Nickel is poised for the start of an exciting journey ahead.

Unit 8, Churchill Court, 331-335 Hay Street SUBIACO WA 6008
