

## POSEIDON NICKEL MEDIA FACTSHEET 1

**Poseidon Nickel Limited** is a nickel sulphide development company with 3 near operational projects located within a radius of 300km from Kalgoorlie in the Goldfields region of Western Australia.

Poseidon's strategy is focussed on the recommencement of operations at established nickel producers in Australia where project risk capital and operating costs are low. A critical element of this strategy is to acquire projects with high levels of geological prospectivity likely to lead to a substantial extension of the projects life through the application of modern nickel exploration techniques. These exploration techniques have been proven repeatedly at Poseidon as well as several other well-known nickel producers in Australia.

Poseidon owns the Windarra Nickel Project which will produce ore to be toll treated locally as well as Lake Johnston which incorporates a large concentrator of its own. Poseidon has recently announced its intention to purchase the Black Swan Project which also includes its own concentrator plant.
