

### Neil Hutchison

General Manager - Geology

Neil Hutchison has over 25 years of experience in the resource/mining industry, working throughout Australia and overseas. He has a track record of discovery, resource/reserve definition, project development, evaluations and acquisitions. Neil has extensive experience in gold, cobalt, copper, lithium, nickel, uranium and vanadium.

Neil was formerly the Exploration Superintendent at the Cosmos Nickel Project with Jubilee Mines. He was part of the highly successful exploration team that discovered the Alec Mairs, Prospero and Tapinos deposits which lead to the takeover of Jubilee Mines. During his time at Jubilee Mines, Neil developed a solid understanding of the nickel and ultramafic forming processes as well as the associated modern exploration techniques required to explore for nickel in Kambalda style ultramafic systems.

Since joining Poseidon Nickel in 2007, Neil and his geology team have developed the company's resource and reserve base at Mt Windarra. By utilising the skills he developed at Jubilee Mines, Neil lead the team to a new greenfields nickel discovery named Cerberus only 12 months after he joined the Company. Neil and his exploration team have defined over 500,000 tonnes of nickel in JORC resources through discovery, acquisitions and geological reinterpretation including the recent Abi Rose discovery at Lake Johnston.

Neil graduated with First Class Honours in Geology from the University of Southern Queensland and is a member of the Australian Institute of Geoscientists (AIG). He is also a Non-Executive Director of Kairos Minerals, an ASX listed nickel Exploration Company.
